The Right Company; In The Right Place, At The Right Time

Tiryaki is an agriculture trading company creating value through processing and efficient supply chain management of agricultural products. While managing the supply chain, it continues to make investments that add value and efficiency in order to meet the consumer needs.

Supply Chain Management

Sourcing: We buy wide range of agricultural products in large quantities from the worldwide and contracted farmers.

Logistics: Thanks to our product range, we deliver the sourced agricultural products to our customers and production facilities via best solution logistic arrangements.

Processing: We build our factories close to the source and market in the appropriate locality. We work with high capacity and efficiency in order to deliver most convenient products at best value to our customers.

Warehousing: We always keep quality stock for our customers considering food and feed safety.

Trade: We have Turkey's most specialized, experienced and professional trading team. We work hard to provide the best value products for our customers.

Consumers: As a result of efficient supply chain management, we bring agricultural products from farms to table.
